

# Barnyard Rabbit Pellets

Barnyard Rabbit Pellets are formulated for use on commercial farms and less intensive rabbit rearing situations. They may also be fed to guinea pigs.

## Feeding Recommendations

Barnyard Rabbit Pellets can be fed up to a total of 140g per day for good growth rates. They may be fed in conjunction with hay, carrots, grass or other vegetable material. If over fatness is to be prevented, intake should be reduced from 8 weeks onwards. A good supply of fresh, clean drinking water should be made available to the rabbit.

## Ingredients

Grains, grain by-products, plant proteins, vegetable oils, lucerne meal, minerals, amino acids and a specialised vitamin/trace mineral supplement designed especially for rabbits.

## Specifications

Crude Protein	10.0%	(Typical Analysis)
Fat	4.5%	(max.)
Fibre	9.0%	(max.)
Salt	1.5%	(max.)

## Points to note

The coccidiostat Cycostat 66 is included to assist in the prevention and control of intestinal coccidiosis.

Dosage: 100g of feed will provide a 4.95mg dose of robenidine hydrochloride.

Withholding Time: Withdraw medicated feed 5 days before slaughter when producing meat for human consumption.

Cycostat 66 is registered pursuant to the ACVM Act 1997 No. A1557

Available in 10kg bags.
